SUMMARY

Adaptable Web Developer and Technical Analyst with 2.5 years of enterprise technical support experience and hands-on full-stack development training. Skilled in diagnosing complex software issues, building scalable applications, and translating technical insights into business solutions. Motivated by opportunities to develop user-focused applications and contribute to engineering teams through strong problem-solving, communication, and analytical skills.

TECHNICAL SKILLS

Languages: JavaScript, SQL

Tools/Frameworks: React, React Router, Node.js, Express, PostgreSQL, REST APIs, Git, GitHub, VS Code

Systems: Active Directory, Windows OS

Professional: Troubleshooting, Technical Analysis, Workflow Optimization, Team Leadership

TECHNICAL PROJECTS

Whack-A-Mole Game | Web Developer | <https://charlesw1117.github.io/Whack-a-mole/>

React · Context API · State Management

- Built an interactive Whack-A-Mole game featuring dynamic rendering, randomized mole movement, score tracking, and restart logic using React component architecture.
- Solved timing and state-sync issues by restructuring the game loop to use controlled intervals and centralized Context state, ensuring consistent mole behavior and preventing race-condition bugs during rapid user interactions.
- Engineered global game state with Context API to manage game phases, mole position, scoring, and UI updates without prop-drilling.
- Designed reusable components and clean state logic to ensure smooth rendering, predictable updates, and scalable game behavior.

Fitness Tracker | React · Node.js · Express · PostgreSQL · REST APIs · Context API

<https://charlesw1117.github.io/Fitness-Trackr-Pro-PT-1-/> Work in progress

- Collaborated with a team of developers to establish the core architecture of a full-stack fitness application, including page routing, global state management, and API communication patterns.

- Implemented activity creation, deletion, and authentication workflows using React, Context API, and the Fitness Tracker REST API.
- Built reusable components, handled token-based auth, and ensured secure user-specific actions such as authorized activity deletion.
- Contributed to debugging, API testing, and early project planning to align frontend components with backend data models.

EXPERIENCE

Technical Analysis Center (TAC) Professional | Paycom | Oklahoma City, OK

Dec 2023 – Apr 2026

- Delivered technical support and troubleshooting for software functionality and database errors.
- Managed user account lifecycle including provisioning, modification, and secure termination.
- Collaborated with engineering teams to escalate complex bugs and track resolutions.
- Reduced ticket resolution time by 15% through workflow optimization and documentation improvements.
- Utilized Excel and internal TAC systems for data analysis and reporting.

E-Commerce Agent | Costco Wholesale | Oklahoma City, OK | Jul 2020 – Dec 2020

- Delivered high-volume customer support across chat, phone, and logistics channels while resolving issues efficiently, maintaining compliance, and coordinating backend order fulfillment.

Processor | Farmers Insurance | Edmond, OK | Nov 2018 – Dec 2019

- Processed 1,000+ inbound documents daily with 99.8% accuracy, operating automated mail systems and ensuring precise routing to internal departments.

EDUCATION

Fullstack Academy — Software Engineering

Expected July 2026

Focused on JavaScript, React, Node.js, Express, PostgreSQL, REST APIs, and full-stack application development.

Bachelor of Business Administration — Mid-America Christian University

Aug 2020 – Oct 2023

Business Analysis · Accounting · Financial Analysis · Leadership Development

Associate of Behavioral Science — Northern Oklahoma College

2014 – 2017

Psychology · Human Behavior · Problem Solving
